**JAGDAMBA ENGINEERS PROJECT
PVT. LTD.**

Complete Solution For Material Handling.

ABOUT US

Jagdamba Engineers Project Pvt. Ltd. stands as a distinguished leader in the field of manufacturing and supplying a vast array of industrial equipment, with a notable focus on Material Handling, Pollution Control, Industrial Drying Systems, Heat Exchangers, and Process Equipment. With over 12 years of expertise, our company has established a reputation for excellence, underpinned by our unwavering commitment to innovative design and rigorous engineering practices. Our diverse range of solutions is tailor-made to meet the unique needs of our varied clientele, ensuring we remain at the forefront of our industry. The cornerstone of our success is our skilled and experienced team, whose dedication and strong sense of teamwork are pivotal in consistently delivering equipment and services of the highest quality. This dedicated team is instrumental in ensuring that we not only meet but often exceed industry standards, setting us apart in a competitive market. Our approach to business is characterized by a relentless pursuit of excellence, a commitment to continuous improvement, and a deep understanding of the dynamic needs of the industries we serve.

MATERIAL HANDLING

- Galvanised Grain Storage Silo System.
- Grain Handling, Post Cleaning & Milling System.
- Flour Handling, Loading & Unloading Conveying System.
- Malt Pneumatic Loading & unloading Conveying System.
- Grist & Adjunct Pneumatic Conveying System.
- Dust Collection System.
- Husk Handling.
- Coal Handling System.
- Ash Handling System.
- Air Pollution System.
- Lime Handling System.
- Carbon Handling System.
- Truncky Projects
- Erection & Commissioning

WHY US ?

Decades of Expertise

Over 12 years in the industry, ensuring a deep understanding of client requirements and industry standards.

Customized Solutions

Ability to tailor products and services to meet the specific needs of our clients.

Wide Product Range

Offering a diverse array of solutions including Material Handling, Pollution Control, Industrial Drying Systems, Heat Exchangers, and Process Equipment.

Skilled Team

A cohesive team of engineers and craftsmen with a strong sense of teamwork and dedication to their roles.

Commitment to Quality

Unwavering dedication to delivering the finest equipment and services, driven by high-quality standards.

Industry Recognition

Proven track record of meeting and exceeding client expectations, ensuring long-term relationships.

OUR PRODUCTS

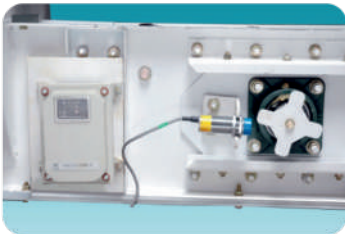

BUCKET ELEVATOR

Bucket elevators are highly functional and are used in various applications as vertical lifts of material such as maize, bajra, coffee, rice, food grains, and other granular materials.

BIN ACTIVATOR

The bin activator is the most economical yet crucial piece of equipment for the smooth functioning of material handling and processing plants.

CHAIN CONVEYOR

A chain conveyor is preferred for the horizontal and inclined transport of grain, malt, seed, and any free-flowing material.

PRE CLEANER

It is used for cleaning purpose such as clean as well as segregation as per required size of material by screening & thus removes the oversize. Impurities from grain, malt & free flow material, Low power consumption, minimum vibration & noiseless operation.

HAMMER MILL

Mill is the most popular and oldest type of grinding mill. The components of a hammer mill are a number of hammers (typically four or more) hinged on a central shaft and housed inside a rigid metal case. By impact, it shrinks in size.

SCREW CONVEYOR

Screw conveyors are used for horizontal and inclined conveying and have a wide range of conveying capacity and length. We provide these conveyors for Dal, Rice, and Grain Flour as their specific needs dictate.

GRAIN DESTONER

The system is used for separating stones from a continuous material flow. Destoners are usually vacuum-type for large capacities and are equipped with vibromotors, fans, and a cyclone fitted with a rotary air lock valve

CLASSIFIER

Can separate Oversized & Undersized Impurities from Free Flow Material like Rice, Maize & Paddy etc. Machine have Self Cleaning due increase Efficiency during Production Cycle.

WEIGHING SYSTEM

Automatic weighing system equipped with Buffer hopper, weighing hopper on load cell, batch hopper which is controlled by rotary airlock valve with screw conveyor at the outlet for the smooth discharge of the flour at desired flow rate in to the premasher upstream of the liquefaction section.

PREMASHER

The premasher is used to mix the hot water and grist in order to break up the clump of grist before moving it to the mash conversion vessel.

EPC SERVICES FOR CBG PLANTS

What We Offer:

- Engineering: Customized design & feasibility studies.
- Procurement: High-quality equipment sourcing.
- Construction: Installation, testing, commissioning.
- Benefits: Reduces emissions, manages waste, generates revenue.
- Support: Government subsidies, SATAT compliance.
- ROI: 3-5 years payback.

Why Choose Us?

- Single-point accountability.
- Expert execution.
- Sustainable growth.

PHARMA INDUSTRY

At the heart of our organization lies our greatest asset – our team. This group is a diverse blend of highly skilled engineers and master craftsmen, each member bringing a unique set of skills and experiences to the table. What truly sets them apart, however, is their unwavering dedication and a deep-rooted sense of teamwork. Together, they form an unbreakable backbone for our company, driving us towards success. Their collective expertise is not just a resource but a cornerstone that allows us to address complex challenges with confidence and creativity. This synergy has been pivotal in consistently delivering outstanding results, helping us carve a niche of excellence in our field. Each project we undertake is testament to their skill, commitment, and collaborative spirit, making them not just our team but our most valuable asset.

VISION

To be a globally recognized engineering and consultancy leader, delivering innovative, sustainable, and reliable solutions that shape industries and empower communities.

MISSION

Our mission is to deliver end-to-end engineering and consultancy services that emphasize quality, safety, and timely execution. We strive to combine advanced technology with the expertise of our skilled professionals to create sustainable, cost-effective, and reliable solutions. Guided by integrity, transparency, and a customer-first approach, we are committed to building long-term relationships while contributing to industrial growth and infrastructure development across India and internationally.
